

Buy 3, Get 1 FREE on Blue Autoradiography Film!!

Our film provides sharp, clear results without the foggy background or grainy images normally associated with non-blue films. High sensitivity and suitable for weak signals/low radioactivity levels.

- For blotting & sequence autography
- Use with 145C, 32P, 33P, 35S & 125I
- Optimized for chemiluminescence
- High sensitivity & contrast
- Compatible with automatic or manual processors
- Ultra clear & dual emulsion
